

Brand introduction

at a glance

Patents

63 technology patents

Quality and Repeatability

- Intelligent ageing equipment
- Factory TUV and UL accredited laboratory for approvals
- Automated production testing equipment
- 29 strong staff in QC team

Innovation

- Developed true flicker free LED driver technology in 2012
- Launched HPC technology to vastly improve dimming stability

Worldwide technology leader

- Joined DALI Alliance in 2015
- Became a DALI Alliance regular member and the 9th DALI-CFG member in 2021
- Launched and deployed DALI2
- Member of Bluetooth SIG
- IoT wireless LED drivers

Ideal for almost any type of luminaire

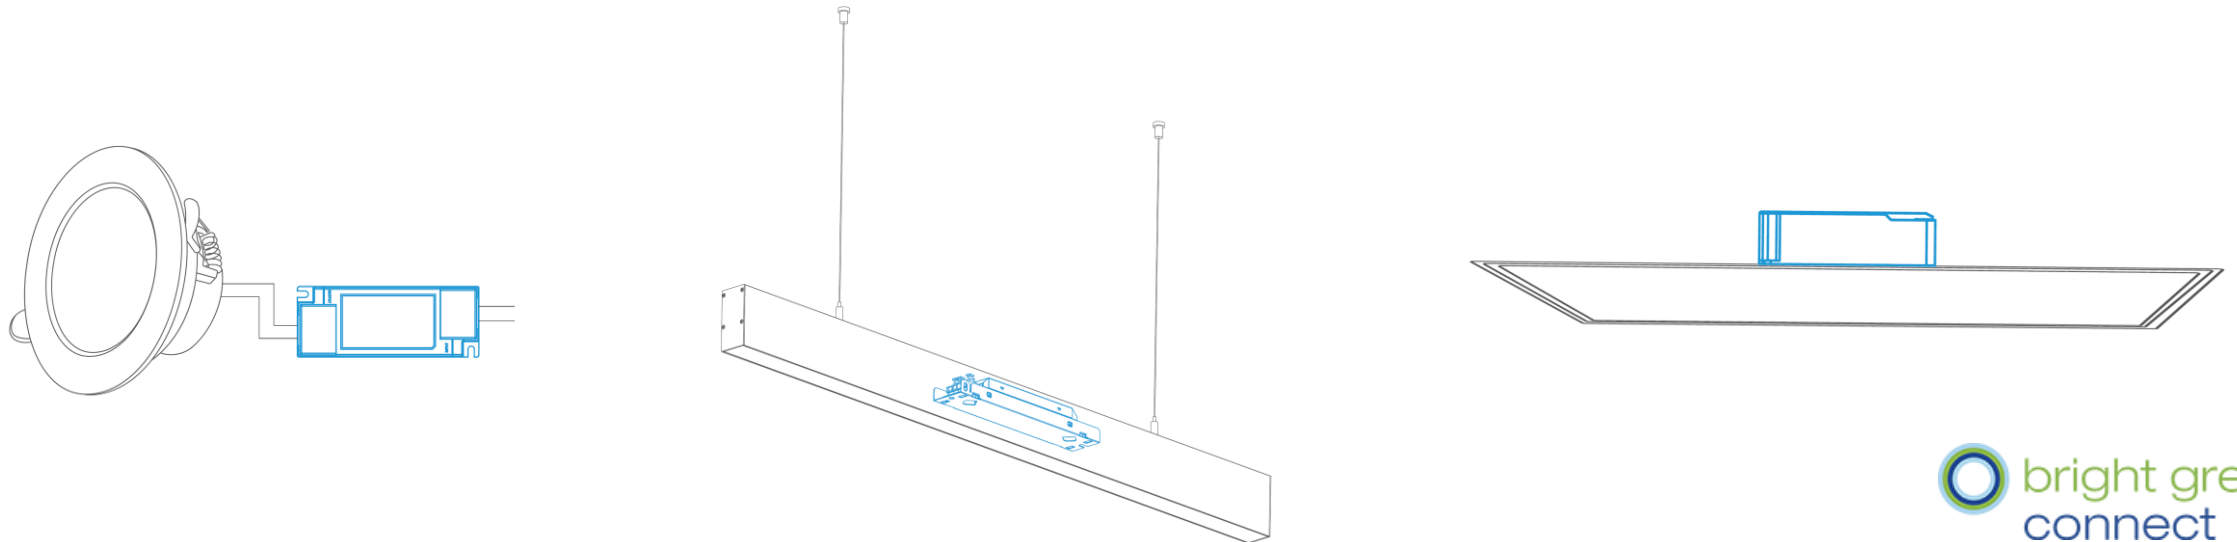

All types of dimming control and easy adjustable output

Why use **BOKE** LED drivers

- DIP switch ranges reduce inventory value and complexity
- Investment in innovation quickly brings the latest technology into the range
- Class leading dimming, control and DALI2 product ranges
- Commitment to R&D, testing and quality control ensures reliability and consistency

Our expertise

Flagship retail development, Kuwait >
Constant voltage LED drivers and DMX control

London Heathrow >
LED lighting drivers, DALI control and emergency packs

St James Square, London >
Constant voltage LED drivers and Dimmable LED Drivers

IMAX Waterloo, London >
Constant voltage LED drivers and DMX control

The Igloo Bar, UK >
Constant voltage LED Drivers and RGB control

Marks and Spencer, Nationwide >
Super-slim constant current LED drivers

Bright Green Connect is the distributor and technical partner for BOKE.

We have local stock and an expert support team.
